

## Questioning for higher order levels of response

Knowledge	Comprehension	Application	Analysis	Synthesis	Evaluation
How would you describe?	How would you explain?	How might you use this differently?	What are the differences?	How would you go about making changes to this?	What evidence do you agree with?
What would you include in a list of..?	How would you classify this list?	How would you use your learning to solve....?	What are your reasons for thinking that?	How can you elaborate on this?	What would you recommend should happen next?
How can you show your results?	How would you summarise this?	What approach would you use instead?	What conclusions can you draw?	What is the alternative?	How can you defend the conclusions drawn?
How would you show the results?	What else can you say now that you have read more?	How will you that you have understood the concepts here?	How can you categorise this?	What could be done to minimise / maximise this?	What choice would you have made?
Who were the main.....?	What do you think the main points are here?	What other way would you plan to do that?	How would you classify this?	How could you design this differently?	How can you justify your answers?
When did this happen?	What do you think is the best answer here?	How can you make use of the facts you have collected?	What evidence do you have?	How can you formulate a theory to support your hypothesis?	How would you prioritise this?
Which one would you choose?	What is the main idea here?	What would you select here to back up your argument?	How can you make a distinction between?	How could you model this idea?	What data have you used to back up your arguments?
What are the main points?	How can you show that you have understood the main points?	What elements would you change?	What are the different functions and how do they work together?	What could you do next?	What is the value/importance of this?
