

LEARNING CULTURES

CPD FOR EDUCATORS

Tomorrow's Classroom Today

We shine a light on the strategic futures that need careful planning. Our training materials include resources for challenge and deeper thinking and activities to encourage professional learning conversations. They are designed to create a new dawn of highly interactive, virtual, continuous professional development.

THE NEW WORLD OF CPD

CPD Online

Essential
training at
flexible times,
in flexible
places at a
flexible pace

One of the essential elements of returning to the rhythm of school life is the focus on strategic CPD that will support all staff to be equipped and ready for the challenges ahead. CPD is highlighted as an essential element of strategic planning that will be necessary to determine the road map to new futures.

We continue to offer our range of innovative, highly interactive online training and coaching webinars and bespoke off the-shelf courses all designed specifically for the education profession.

Hopefully, face to face training will return but not yet. We are here to create the highest quality CPD offer that delivers relevant, sustainable and cost-effective solutions.

CASCADING THE LEARNING

CPD is only relevant and powerful if it is acted upon and can be disseminated widely. Where the learning is cascaded to others, the recipient of the training deepens their own knowledge and enhances their skills. Those who share the learning are part of a collaborative process of continuous and sustained improvement.

Our approach creates a culture of reflective practice, professional conversations and deep learning.

All our courses are designed to give the recipient a wealth of resources, activities and research in order that the learning is cascaded to others.

COST EFFECTIVE AND FLEXIBLE

The online revolution was slow to start in education. Everything has changed, we can see the potential and the benefits of a new world of dynamic learning.

For all, there are myriad ways of accessing the information, suiting multiple learning styles.

No travel costs, no hotels to book and much more flexibility in terms of cover and time availability.

Every member of the Learning Cultures' coaching and training team is a successful educator. We have the experience, we understand the issues, we have the solutions.

We can create strategic futures to support leaders, managers, teachers, Teaching Assistants and those who have an administrative or technical role.

“Thank you, such inspirational training. I have so much to take away to share with colleagues. The opportunity to share ideas and use the resources to challenge myself and others has given us much more than we could have hoped for.”

Our courses are rich in content that is accessible and stimulating.

We want all those who take part in our training to be challenged so that by the end of their virtual time with us they know they have a wealth of new knowledge to use and disseminate to others.

THE DIFFERENCE

We use card sort activities and ask questions that challenge the delegate out of their comfort zone. Graphics and images provide a visual interpretation of the messages we want to convey.

Every element of the content is relevant to current policy and inspection issues. We draw on the work of education experts and commentators.

Making the Transition from Home Schools to the Classroom

1. A positive and strategic review of transition to avoid a well-researched and continued dip in learning that continues to exist as learners move from key stage to key stage.
2. Creating a tapestry curriculum where literacy and numeracy and wider learning skills are woven through every subject.
3. Defining and deepening understanding of the importance of metacognition where teachers focus on the pedagogy that fosters independence, reflection and resilience.
4. A strategic focus on formative assessment to build a consistent approach across all subjects that leads to challenge, progression and deeper learning.

10

Strategic Solutions

Creating a future
that is better than
before

“Education is not the filling of a pail, but rather the lighting of a fire.”

WB Yeats

“Celebrating resilience, steadfastness and determination and capturing the skills students have developed”

5. The creation of a coaching culture where professional learning communities share, collaborate and innovate towards building a consensus for continuous improvement.
6. Capturing the technology that has sustained learning away from school. Creating a whole school strategy to promote independent and interactive learning using a variety of online platforms.
7. Develop a structured quality assurance policy and strategy that creates a cohesive whole school blueprint for implementing a new or refined curriculum vision.
8. Create highly visible partnerships between experts in literacy and English and other subject experts to prioritise reading and comprehension as the principal driver for successful learning.
9. Build a curriculum strategy that looks at sequential learning pathways in all subjects from early years to the end of key stage 3 fostering seamless learning and deeper understanding.
10. Create a strategy for learner voice where the learner is seen as the expert in how they have achieved success in their own way and what their needs are going forward.

We offer you two choices of CPD packages

Our asynchronous courses are stand-alone and ready to use to suit your own CPD timetable.

Our live webinars are delivered by one of our team of experts face-to-face over an online platform either as morning or twilight sessions.

ASYNCHRONOUS AND READY TO USE CPD

Re-thinking Appraisal and Performance Management - Creating a coaching culture that leads to influential change through positive learning conversations.

The Art of Positive Lesson Observation - creating a culture where lesson observation is a collaborative part of continual professional learning.

Formative Assessment in the Primary School - Creating the pedagogy of challenge, progression and deeper learning.

Formative Assessment in the Secondary School - Developing new approaches to pedagogy that will support teacher assessment and independent learning leading to deeper thinking and greater challenge

Defining and Enhancing the Role of the Subject Leader - a 'deep dive' into subject specific implementation through highly effective team building and collaboration

The Learning Room - a series of strategies linked to metacognition and thinking skills that will enhance pedagogy and create a seamless tapestry of learning through the key stages

These five section packages are ready to use at any time. Each course is a cornucopia of interactive videos and presentations, materials and resources. Each section is easy to follow for your INSET, twilights or other training sessions.
